

Stopping TB Before It Starts in the Era of ART: Real-World Evidence From 6 Countries

Intra-TRAC
Seminar

WEDNESDAY

 **September 30, 2026**

 **12-1PM**

 **Virtual presentation to
CNR 3001 & via Zoom**

Seth Zisette, PhD, is a postdoctoral fellow in the Johns Hopkins Bloomberg School of Public Health Department of Biostatistics. His research leverages epidemiological and statistical causal inference methods along with real-world data to understand and inform disease treatment and prevention efforts, particularly by translating clinical trial results to broader programmatic settings. His work includes applications to TB, HIV, and opioid use disorder.
